Volume 149

H. Antonius van den Berg, Multiple nutrient limitation in unicellulars: reconstructing Liebig's law 1

M.G. Roberts, R.R. Kao, The dynamics of an infectious disease in a population with birth pulses 23

G.E. Hernndez, Age-density dependent population dispersal in R^n 27

E Beretta, Y. Kuang, Modeling and analysis of a marine bacteriophage infection 57

G.J. Vulcano, D.F. Moses, A. Valcrcel, M.A. de las Heras, A lineal equation for the classification of progressive and hyperactive spermatozoa 77

F.D. Alfano, A stochastic model of cellular transformation and its relevance to chemical carcinogenesis 95

T. Radivoyevitch, D.G. Hoel, P. Hahnfeldt, R.K. Sachs, Size distributions of misrejoining DNA fragments in irradiated cells 107

J.D. Evans, G.C. Kember, Analytical solutions to a tapering multicylinder somatic shunt cable model for passive neurones 137

A. Mukhopadhyay, J. Chattopadhyay, P.K. Tapaswi, A delay differential equations model of plankton allelopathy 167

M.A. Charleston, Jungles: a new solution to the host/parasite phylogeny reconciliation problem 191
